Re: ACT/045/013

Dear Mr. Tetting:

Enclosed please find the final design for the Mercur project millsite. This map amends our application in this regard.

As you can see, the center of area has been moved approximately 850 feet to the southeast from our original proposal. This has the effect of decreasing the cutwall heights and producing a more aesthetically balanced cut and fill layout. The total disturbed acreage is about 36 acres, a slight decrease from the original proposal.

The sediment control shown is temporary and may be altered during final design which will also "connect" the millsite with the county access and the mine.

Very truly yours,

A handwritten signature in dark ink, appearing to read 'Brian W. Buck', written over a faint circular stamp.
